Putting Japanese Technology to Work for Optimum Energy Solutions

Applying the Synergy of Japan's Private and Public Sectors to Create Solutions

Projects for Increased Energy Production, Higher Energy Efficiency and Renewable Energy Systems

The Japanese Business Alliance for Smart Energy Worldwide, commonly known as JASE-World, was founded in 2008 to promote advanced energy initiatives and implement them in partnership with governments around the world. One of its major goals is to contribute to solving global-scale issues such as climate change, energy security and so on.

Composed of 48 of Japan's largest and best-known industrial corporations as well as 20 industrial associations*, JASE-World focuses the vast resources and capabilities of these organizations to provide innovative ideas and effective ways to carry them out. The goal is to give partner countries the best possible energy solutions — higher energy production that is environmentally friendly, low cost and sustainable.

*As of April, 2016

JASE-World already has an impressive history of successful partnerships, and is presently engaged in a wide variety of projects in many countries. For all types of energy solutions, from homes, offices and communities to factories and infrastructure, JASE-World is ready to help you achieve your energy goals.

Working Groups

Energy Saving Solutions

Public - Private Cooperation

Solar Power

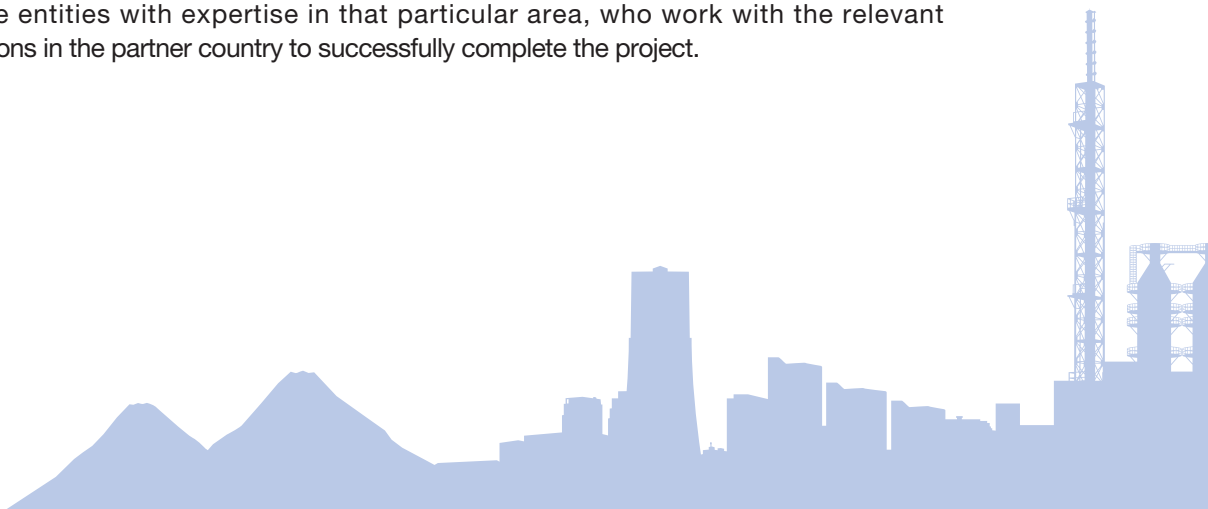

Geothermal Power

Waste to Energy Power

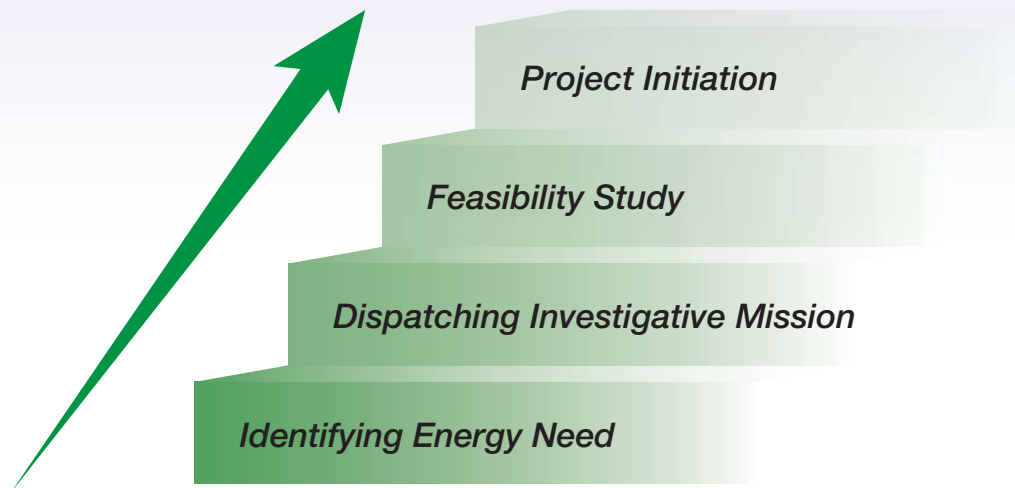

JASE-World has established Working Groups in five key areas to initiate, coordinate and implement energy projects in cooperation with partner government organizations and corporations. Once a need is identified, Sub-Working Groups are set up composed of the Japanese entities with expertise in that particular area, who work with the relevant organizations in the partner country to successfully complete the project.

JASE-World Offers Support Every Step of the Way

Business Approach

From identifying energy needs, to final project implementation, JASE-World offers in-depth support to enable you to realize your goals.

Support from JASE-World Members

Countries Where JASE-World has Dispatched Missions, or Held Workshops

Japanese Smart Energy Products & Technologies

A compilation of smart energy products and technologies available from JASE-World members. These are classified into nine categories: Factory, Industries, Office building, Residence, Construction/transportation & Logistics, Power Generation & Distribution, Renewable Energy, Energy Solutions, and Smart community

The book is available in English, Chinese, Spanish, Portuguese, Russian and Vietnamese.
